

## High-Interest Science Classroom Libraries

Use these specially selected sets to accomplish two challenging goals: enhancing reading achievement and sparking student interest in science. Colorful, fact-packed volumes complement the lesson plan while offering nonfiction reading in the subject areas.

### High-Interest Science 1

Thomson Gale joins forces with Discovery Communications to offer 39 appealing TV tie-ins that capture the excitement of popular shows from Animal Planet and The Learning Channel.

From the animal adventures presented by Jeff Corwin, to the physical science appeal of *Super Structures*, to the life science lessons from *Body Story*, these titles address high-interest topics in a way that grabs attention.

### High-Interest Science 2

This set of 50 books is specially selected to deliver engaging nonfiction reading in a variety of topics tied to the science curriculum – from an alphabetic safari to the fundamentals of physics.

Age-appropriate text and vivid graphics provide kid-friendly information in areas of physical science, life science, earth science and technology.

Each High-Interest Science classroom library features a teacher's guide and student activities & assessment masters. Materials include standards alignment, suggested lesson plans, discussion guidelines, key ideas and teaching sequences.

# High-Interest History/Social Studies Classroom Libraries

Bring needed informational reading in geography, social studies and history to your school with high-interest classroom libraries. These volumes use a two-tiered reading approach to engage students at a variety of reading levels.

## Discover America State by State

This alphabetic tour of the United States encourages nonfiction reading. Fifty-one charming volumes – one for each state and the District of Columbia – are designed to foster reading skills.

Original artwork, read-aloud rhymes and appealing expository text spotlight the history, landmarks, events and people that make each state unique. Use this set to raise student reading achievement in history, geography and social studies.

## Citizenship

Young students have a natural curiosity about their country and what citizenship is all about. The rights and responsibilities of living in a democracy are highlighted in this classroom library.

The A-B-Cs of everything from immigration to national parks is explored in a way that relates to children and compels them to question and learn more in the content areas of social studies and history. The reading format, which combines easy rhymes with more sophisticated expository text, helps students grow their vocabulary while they learn about America.
