

A Wish to Be a Christmas Tree

Tree Mapping (Grades 2-3; writing, language arts, science)

All trees are important. They provide shade from the sun and shelter from winter winds. In the forest, they provide homes and food for many animals. In the city, they help quiet traffic noise. Trees also produce oxygen and absorb carbon dioxide, helping to maintain our air quality.

Last but not least, trees add beauty to our environment. There are many reasons we need trees!

Download and copy this tree design for each student and have them write their five favorite tree facts in the circles. They can color in the illustrations for a classroom display.
