

# Master Index

The master index is a comprehensive index of all thirteen volumes of *Career Information Center*. It includes subject terms from Volumes 1 through 13 and lists all the jobs that are mentioned in the twelve volumes of job profiles. Entries that appear in all capital letters have separate occupational profiles in one of the twelve volumes. Entries that are not capitalized refer to jobs that do not have a separate profile but for which information is given

Under some capitalized entries there is a section titled "Profile includes." This lists jobs that are mentioned in the profile.

Some entries are followed by a job title in parentheses after the page number on which it can be found. This job title is the occupational profile in which the entry is discussed.

Some index entries include the line *See Getting Into section of individual volumes*. The Getting Into section is identical in volumes 1 through 12 with the exception of the Trade and Professional Journals list at the end of each volume.
