World History and Geography: 1500 A.D. to the Present

These standards enable students to cover history and geography from 1500 A.D. to the present, with emphasis on Western Europe. Geographic influences on history continue to be explored, but increasing attention is given to political boundaries that developed with the evolution of nations. Significant attention will be given to the ways in which scientific and technological revolutions created new economic conditions that in turn produced social and political changes. Noteworthy people and events of the nineteenth and twentieth centuries will be emphasized for their strong connections to contemporary issues.

The study of history rests on knowledge of dates, names, places, events and ideas. Historical understanding, however, requires students to engage in historical thinking, to raise questions and to marshal evidence in support of their answers. Students engaged in historical thinking draw upon chronological thinking, historical comprehension, historical analysis and interpretation, historical research, and decision-making. These skills are developed through the study of significant historical substance from the era or society that is being studied.

WHII.1 The student will improve skills in historical research and geographical analysis by

- a) identifying, analyzing, and interpreting primary and secondary sources to make generalizations about events and life in world history since 1500 A.D.;

Modern World History Resource Center includes thousands of primary and secondary source materials indexed to key Modern World History topics. Students can access these materials through a variety of search paths and can use the materials to build research-based presentations. In addition, Modern World History Resource Center includes a Student Research Guide, which defines Primary and Secondary sources and indicates how each can be used when researching a particular topic.

- b) using maps, globes, artifacts, and pictures to analyze the physical and cultural landscapes of the world and to interpret the past since 1500 A.D.;

Modern World History Resource Center includes thousands of primary and secondary source materials indexed to key World History topics. Search results include maps and other images. In addition, by searching for the subject "Maps," and following its topic tree, students have instant access to a variety of maps, including atlases, military maps, road maps, statistical maps, topographic maps, etc.

- c) identifying geographic features important to the study of world history since 1500 A.D.;
