

SEARCHES FOR EXPANDED ACADEMIC ASAP

Subject Guide Search

1. Atomic theory
2. Nuclear power
3. Industrial revolution
4. Origin of Species
5. Age of Imperialism (automatically does a Keyword Search)
6. Holocaust (shows good subject guide list with “see” and “see also” references)

Relevance Search

1. human resistance and disease
2. gene mutations
1. new age movement (search in Entire Article Content) Note: first article 100% relevance

Keyword Search

1. ecosystems
2. sedimentology
3. germ theory

Advanced Search

1. Su recovered memor* -- searches for articles indexed under subjects in which *recovered* and words that begin with “memor” (memory, memories, etc .) occur.
Limit Search by checking Refereed Journals and full text articles.
2. Ti book w1 reviews and au bouchard
Searches for articles in which *book* is immediately followed by *reviews* in the title (actually the annotation) and the author of which is named Bouchard (alone or as part of a hyphenated name). The proximity operator w1 indicates the direction (forward) and the number of words apart (one, meaning no intervening words).
