Encyclopedia of Clothing and Fashion

PUTTING FASHION IN CULTURAL CONTEXT

e Tracing the stylistic and functional threads that unite clothing across time and cultures — as well as delving into the divergent styles and significance of apparel — this A-to-Z *Encyclopedia* is the essential resource for exploring the relationship between culture and couture. A new addition to the Scribner Daily Life Series — which includes the best-selling and Dartmouth award-winning *Encyclopedia of Food and Culture* — this broad-based set surveys clothing, body adornment and examines the origins of clothing, the development of fabrics and technologies and the social meanings of dress. It also presents information on representative costumes from a wide variety of historical eras, which are frequently the topic of student research.

Topics range from the bustle, sari and toga to polyester and body piercing. The short entries explain the history of garments (necktie, codpiece, cocktail dress, bathing suit, Nehru jacket), techniques and manufactures (batik, dry cleaning, zipper, stone washing), body adornment (makeup, mask, tattoo, wig), and important persons and institutions (Coco Chanel, Edith Head, Yves Saint-Laurent). The longer essays provide cultural context: class, gender, sumptuary laws, costume design for stage and screen, advertising, fashion careers, military uniforms and more.

The set includes a comprehensive general index and topical outline in the last volume. From the secondary-school student writing a paper on dress among Native Americans to the university student interested in the underpinnings of clothing design to the general researcher with broad interests, this three-volume set represents a unique and valuable source.

THIS THREE-VOLUME SET INCLUDES:

- 640 A-Z articles both international in scope and interdisciplinary in coverage
- Approximately 600 illustrations
- Approximately 370 specialist contributors from around the world
- Cross-references and boxed sidebars
