

DISCovering® Biography

Information on the 2,000 most-studied people in the world

DISCovering Biography is your best electronic source of personal data on important people most studied by students, from ancient times to the present. This database profiles authors, politicians, philosophers, scientists, musicians, actors, scholars and others with essays that include vital statistics, achievements and details of their lives and work. Search by:

- Name, pseudonym or nickname
- Ethnicity/nationality
- Gender
- Birth and death dates
- Awards
- Occupation

Applications

Students, faculty, media specialists and other researchers will find many uses for *DISCovering Biography*. Educators will find an abundance of ideas for lesson plans. The database is available in CD-ROM and online formats and designed to support curriculum integration, team teaching and the use of technology in the classroom.

Benefits

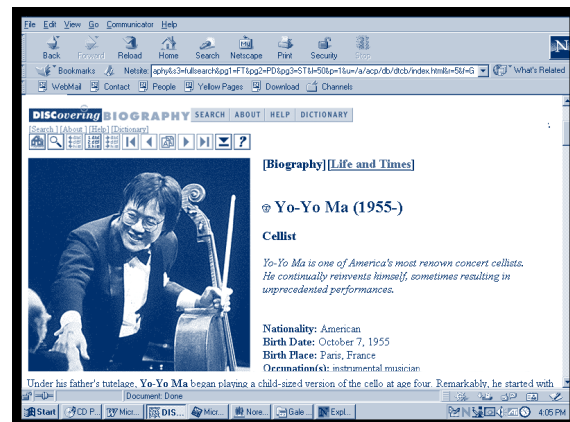

Providing an easy-to-navigate format, *DISCovering Biography* guides students to important, cross-referenced essays and facts. With the convenience and speed of an Internet search, information on 2,000 important people is just a mouse click away. A wide range of search results offers a single source of answers to most inquiries.

"Powerful search options within numerous categories allow students to quickly find data."

— CURRICULUM ADMINISTRATOR

The database is also searchable by keywords. When students are not sure of the name they are looking for, they can browse alphabetized lists of people, places, subjects and occupations, or timeline events from 3420 B.C. to 1990. The subjects include:

- Mathematics and Natural Science
- Engineering and Technology
- Medical Science
- Social Science
- Art and Culture
- Sports
- Diplomatic and Military History
- Business, Labor and the Economy
- Government
- Daily Life
- Physical Earth

▲ Find photos and detailed biographies on thousands of the world's most notable individuals

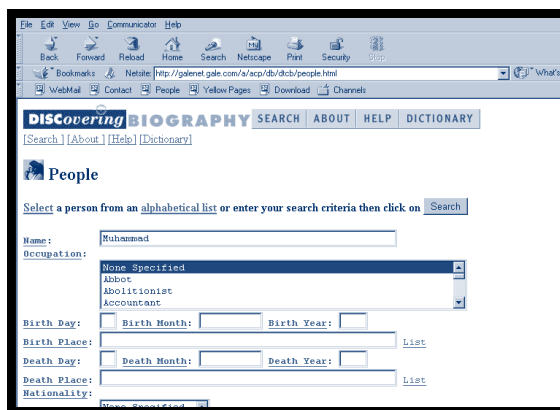

More features

Schools and other network administrators find the common interface, support of national and local academic standards, and the information integrity offered by the Gale Group reassuring when considering this database for wide-area applications. It offers 24-hour remote access from any Web-capable computer.

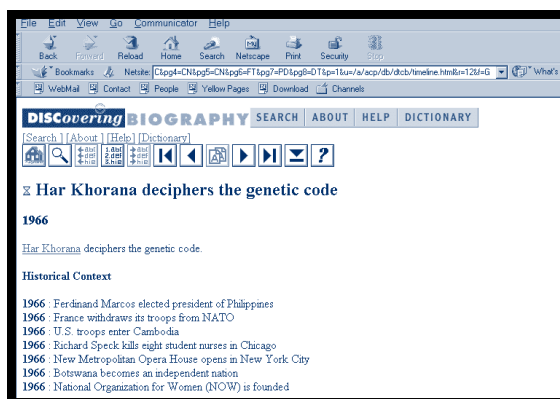

As part of The Gale DISCovering® Program, *DISCovering Biography* meets your electronic reference needs independently but offers a common interface — easily learned and applied across databases. Designed to offer students a multidisciplinary understanding of curriculum-related topics, Gale DISCovering databases incorporate numerous cross-references to people, places and ideas that add to a deeper understanding of literature, science, history, social studies and multicultural studies.

Availability
