

Enfermedades y trastornos de la salud

(Human Diseases and Conditions)

“Any school or public library that can afford *Human Diseases and Conditions* could not go wrong in purchasing it.”

— Library Journal (April 15, 2000, on the original *Human Diseases and Conditions*)

MORE THAN JUST A TRANSLATION

Published in coordination with the Alfred du Pont Hospital for Children, this three-volume Spanish edition from Charles Scribner's Sons®, a imprint of Gale, part of Cengage Learning, presents the best-selling *Human Diseases and Conditions*. Written by doctors, translated by experienced medical translators and reviewed by Spanish speaking physicians, this set addresses the need for reliable health information among Spanish-speakers. Using non-colloquial, standard American Spanish, this full-color set presents accurate and up-to-date information on 280 conditions and diseases. In addition to photographs, special features include definitions, fact boxes, historical and literary sidebars and diagrams and much more.

COMPREHENSIVE HEALTH INFORMATION THAT IS:

- Created by a team of pediatricians and other medical specialists
- Written in standard Spanish, making the information both engaging and informative
- Filled with print and electronic resources, as well as keywords for Web searches, marginal definitions and sidebars
- Alphabetically organized, with subheadings and instructive diagrams

THE IDEAL MEDICAL RESOURCE FOR RESEARCHERS, INCLUDING:

- Middle school and early-high school level readers of Spanish
- Public libraries with Spanish-speaking users in need of current medical information
- Community colleges with a Spanish-speaking student body
- U.S. and Latin American academic libraries

A ONE-STOP SOURCE ON HEALTH

The alphabetically arranged articles in *Enfermedades y trastornos de la salud* cover many interesting topics, including:

- Autism
- Depression
- Down syndrome
- Fibromyalgia
- Lyme disease
- Obesity
- Prostate cancer
- And many others
