

Writing the Critical Essay: An Opposing Viewpoints Guide

New Titles from Greenhaven Press®

Take Critical Essays to the next level

Offering instructive guidance in an appealing format *Writing the Critical Essay: An Opposing Viewpoints Guide* directly supports student achievement. This exciting full-color series is specifically designed to help students write effective five-paragraph essays and beyond. *Writing the Critical Essay: An Opposing Viewpoints Guide* expands Greenhaven Press®'s celebrated *Opposing Viewpoints* product line, providing easy access to multiple sides of current, yet timeless debates — ideal subjects for persuasive writing.

Writing the Critical Essay: An Opposing Viewpoints Guide has all students need to complete an essay on a chosen controversial topic. Using exemplary presentations of opposing viewpoints as research material, each book features:

- Model essays that guide students in writing a particular five-paragraph essay, including persuasive, descriptive, expository, narrative, compare and contract, cause-and-effect essays
- Guided reading and discussion questions that help students understand the essays themselves and target persuasive techniques authors use to compose convincing arguments
- A final essay that encourages students to go beyond the five-paragraph model
- Sequential step-by-step exercises that help students outline arguments, write introductions and conclusions, and ultimately construct their own essays
- Supplemental materials that provide essay topic ideas
- Bibliographic and electronic resources for further research
- And more

Grades 6-10

transition," says Alfred Cavallo, an energy consultant in Princeton, New Jersey. "And you can have a very nice life on a sustainable system. Of course, not everyone is going to be driving SUVs."

Oil in the U.S. to Grow
The oil goes into everything from the fuel for cars, trucks, and planes to the synthetics in our wardrobe and the plastics we touch started in the ground and its cousin, natural gas. The oil-based fuels are the backbone of the modern world.

as the standard family car. Even the tax code encourages consumption, offering people who buy the biggest SUVs for business use a deduction of up to \$100,000. Since 1988 the average gas mileage of U.S. passenger vehicles has fallen, while the world has burned up more than a third of a trillion barrels of irreplaceable oil. . . .

Sooner or Later, the Oil Will Run Out
These days a raging debate divides oil experts, with prophets of imminent shortage pitted against believers in at least a couple more decades of abundance. Pessimists note that oil prospectors had their best luck in the early 1960s, and that discoveries have slowed since then. They conclude that little conventional oil is left to be found and that the oil peak could be upon us by 2010. . . .

Some oil wells have experienced a dramatic decline in production, supporting claims that the world is running out of oil.
