Help your staff become information scientists

Librarianship was never simply a matter of organizing books on shelves. This is most clearly illustrated by examining the changing role librarians have played through the last decades. With the wide range of print and electronic resources now available, librarians have become information scientists. The immense value of the librarian lies in how they deal with issues related to contemporary library science: collection development, archival organization, learning new technologies, managing vast amounts of data and — of course — helping researchers find their way through the maze of available information to the sources that best suit their needs.

Thomson Gale™ imprint K. G. Saur™ — known throughout the world for first rate library science resources — offers a variety of titles created expressly to aid information professionals and their development. Order them individually or enjoy special savings when you order all the titles in related groups, chosen for relevance by the main selector at the School of Information, University of Michigan, Ann Arbor.

---

**Growing and Knowing: A Selection Guide for Children's Literature**

“A thorough and thoroughly informative book. … Suitable for academic libraries or large public libraries.”

— School of Information Librarian, University of Michigan, Ann Arbor

**NEW TITLE** The primary function of this book is to serve as a guide to the selection of books for children, recognizing the vast range of books published and the individual rates of reading and social development of different children.

U.S. $84.60.

---

**Archival Appraisal: Theory and Practice**

“A solid, practical reference to a topic not frequently treated. Suitable for academic, special and large public libraries.”

— School of Information Librarian, University of Michigan, Ann Arbor

**NEW TITLE** This resource discusses the importance of collection appraisal for information specialists, records managers, and corporate information managers and archivists, against the background of the information explosion.

U.S. $79.20.

---

**Work Culture Transformation: Straw to Gold — The Modern Hero’s Journey**

“A useful work of theory and philosophy regarding modern and changing information work. Suitable for academic and special libraries.”

— School of Information Librarian, University of Michigan, Ann Arbor

**NEW TITLE** In the 21st century it is essential that information professionals adapt to a new way of working, ensuring their survival as a profession, but also ensuring that knowledge is used to its optimum within the work place. This unique book clearly demonstrates the need for change and ways to help individuals and organizations succeed in work culture transformation by using metaphors occurring in fairy stories, myths and fables.

U.S. $85.50.
Information Science in Theory and Practice

“A scholarly, thorough introduction to the field of information science. Suitable for academic libraries, especially those with library schools or schools of information.”

— School of Information Librarian, University of Michigan, Ann Arbor

NEW EDITION

This classic student and professional text covers the most recent changes to affect the profession, including the Internet and its role in information science and librarianship.

U.S. $108.90.

Communicating Knowledge: Publishing in the 21st Century

“A well-done, brief but comprehensive look at modern publishing. Good coverage of electronic publishing. Suitable for academic or public libraries.”

— School of Information Librarian, University of Michigan, Ann Arbor

This invaluable resource provides an introduction to publishing practices in the context of the information society, placing publishing within the wider context of communication and information and showing how publishing continues to be a key element in the 21st century.

U.S. $95.40.

Thinking for a Living: The Coming Age of Knowledge Work

“An interesting study of the background and future of work and social labor theory. … Suitable for academic or public libraries.”

— School of Information Librarian, University of Michigan, Ann Arbor

NEW TITLE

This book questions beliefs about the role of the information profession and explores related issues in the wider context of different subjects and disciplines. It develops the idea of the knowledge culture and knowledge work and explains the importance of knowledge sharing.

U.S. $85.50.

NEW TITLE

This title provides practical data to support investment decisions in information systems for electronic media. Like the previous edition, the title quantifies the future size of the electronic publishing industry and provides practical data to support investment decisions in information systems for electronic media and serves as an aid to forward planning.

U.S. $85.50.
Semantics of Retrieval

Targeting all types, Semantics of Retrieval looks at the use and manipulation of language in retrieval systems. Describing both traditional and newer systems, such as search engines, the book also provides sources for further reading, including relevant Web sites.

U.S. $73.80.

Corporate Memory: Records and Information Management in the Knowledge Age

“A good survey of information management in organizations in an electronic environment. Would be useful for archivists. Suitable for academic and special libraries or large public libraries.”
— School of Information Librarian, University of Michigan, Ann Arbor

NEW EDITION This book describes methodologies and approaches for record management and archiving. It also discusses the adoption of an international standard for records management.

U.S. $73.80

Document Management: New Technologies for the Information Services Manager

“A good overview of current technology and applications in document management. … Suitable for academic and special libraries.”
— School of Information Librarian, University of Michigan, Ann Arbor

This book shows information services management professionals how to manage documents in the electronic age and how the application of document management technologies can optimize the productivity of the work process.

U.S. $49.50.

Beyond Degrees: Professional Learning for Knowledge Services

“A useful and thorough look at continuing the education of the information professional in and out of the workplace. Suitable for academic, special and public libraries.”
— School of Information Librarian, University of Michigan, Ann Arbor

This book provides guidelines for conceptualizing, designing and measuring successful programs for professional learning, staff development and growth within an organization.

U.S. $59.40.

www.gale.com • 1-800-877-GALE
Establishing an Information Center: A Practical Guide

“A very useful, informative how-to regarding the creation, promotion and functioning of an information center. The varied case studies with personal commentary are especially useful. … Suitable for academic and special libraries and large public libraries.”

— School of Information Librarian, University of Michigan, Ann Arbor

This title teaches the new librarian, student or librarians taking on new roles how to establish an information center. It covers different aspects of establishing and running a special library, including space planning, collection development and service.

ISBN 3-598-24365-0. Order #GML47204-180920.
U.S. $57.60.

Entrepreneurial Librarianship: The Key to Effective Information Services Management

“Though published in 1996, the book is still useful in outlining the process of promoting more entrepreneurial activities in library and information centers. Suitable for academic and special libraries and large public libraries.”

— School of Information Librarian, University of Michigan, Ann Arbor

This book offers specific techniques for creating an entrepreneurial environment in a library or information service organization — ranging from taking risks, to cultivating teamwork, to demonstrating leadership.

U.S. $41.10.

Digital Libraries: Implementation and Use from a Global Perspective

NEW TITLE This book examines the various options for setting up digital libraries from digitizing information to providing the interface to access the information held by the digital global library. Individual chapters deal with issues including digital library users and services offered to them. Throughout the book, the challenges of developing and implementing digital library systems in multilingual and multicultural environments are explored.

By Lucy A. Tedd and J. Andrew Large.
U.S. $85.50.

Dealing with an International Clientele: Communications, Diplomacy and Etiquette

NEW TITLE This book clearly sets out how to provide an effective library service to users from different countries and ethnic backgrounds and covers communications with users whose mother tongue is not English as well as the differences in cultural etiquette.

U.S. $84.60.
